Zhang, Xiaoxiao 163

Subject Index

Acanthamoeba keratitis
The effect of *Acanthamoeba* concentration on adherence to four types of unworn soft CLs, 27
Acanthamoeba keratitis, 73
Quantitative comparison of *Acanthamoeba castellanii* adherence to rigid versus soft CLs, 111
Adherence of cysts and trophozoites of *Acanthamoeba* to unworn RGP and soft CLs, 247

Allergic conjuctivitis
Controlled comparison of two flourometholone formulations in the antigen challenge model of allergic conjunctivitis, 256

Basement membrane
Reassembly of the α6β4 integrin and laminin in rabbit corneal basement membrane after excimer laser surgery: A 12-month follow-up, 125

Bifocal contact lenses
A quantitative and qualitative assessment of the Solitaire bifocal CL, 20
Clinical experience with the SimulVue soft bifocal CL, 96

Blepharitis
Chronic blepharitis: A review, 200

Book reviews
Ophthalmology: A primer for medical students and practitioners, 5

CLAO
Swimming with the current (guest editorial), 152

CLAO member survey
Swimming with the current, 152

Cleaning efficacy
Quantitative cleaning efficacy evaluation methods with protein and lipid lens soiling models, 154

Collagen shields
The use of collagen shields impregnated with Amphotericin B to treat *Aspergillus* keratomycosis, 252

Confocal microscopy
In vivo confocal microscopy of corneal wound healing after excimer laser photorefractive keratectomy, 273

Contact lenses(CLs)
A quantitative and qualitative assessment of the Solitaire bifocal CL, 20
Antimicrobial efficacy of two commercial RGP CL care systems, 24
The effect of *Acanthamoeba* concentration on adherence to four types of unworn soft CLs, 27
Ulcerative keratitis from overnight CL wear compared with other life risks, 31
Identification of fungi growing within soft CLs: A report from the neotropics, 35
Development of a new soft gas permeable CL with Dk 300, 38
Corneal topographic changes after refitting polymethylmethacrylate CL wearers into gas permeable materials, 47
Computerized videokeratoscopy CL software for RGP fitting in a bilateral postkeratoplasty patient: A clinical case report, 52
Effect of diclofenac sodium (Voltaren™) on hypoxia-induced corneal edema in humans, 61
Will young children comply and follow instructions to successfully wear soft CLs? 86
Gentle Touch™, a lens material resistant to protein deposition, 93
Clinical experience with the SimulVue soft bifocal CL, 96
A comparative study of the microbiologic effectiveness of chemical disinfectants and peroxide-neutralizer systems, 99
Quantitative comparison of *Acanthamoeba castellanii* adherence to rigid versus soft CLs, 111
Normal protein and glycoprotein profiles of reflex tears and trace element composition of basal tears from heavy and slight deposits on soft CLs, 114
Bacterial contamination in soft CL wearers, 122
Phototherapeutic keratectomy for the treatment of nodular subepithelial corneal scars in patients with keratoconus who are CL intolerant, 130
Quantitative cleaning efficacy evaluation methods with protein and lipid lens soiling models, 154
Acanthamoeba keratitis, 73
CL type, material, and deposits and giant papillary conjunctivitis, 77
Tear LTC4 levels in patients with subclinical CL related giant papillary conjuctivitis, 159
Soft toric lens power accuracy and reproducibility, 163
In vitro ocular irritancy measure of four CL solutions: damage and recovery, 169
Role of the post-lens tear film in the mechanism of inferior arcuate staining with ultrathin hydrogel lenses, 175
Corneal topography in CL wearers following penetrating keratoplasty, 183
The use of rigid gas permeable CLs in scarred corneas, 64
AIDS and the CL practice, 233
Resistance of adhered bacteria to RGP CL solutions, 242
Adherence of cysts and trophozoites of *Aacanthamoeba* to unworn RGP and soft CLs, 247
Fitting CLs after excimer laser photorefractive keratectomy for myopia, 281
Effect of sodium hyaluronate ophthalmic solution on peripheral staining of rigid CL wearers, 261
Effects of long-term rigid CL wear on the endothelium of corneal transplants for keratoconus 10 years after penetrating keratoplasty, 265

Children & contact lenses
Will young children comply and follow instructions to successfully wear soft CLs? 86
The use of collagen shields impregnated with amphotericin B to treat *Aspergillus* keratomycosis, 252
Evaluating the preservative effectiveness of RGP lens care solutions, 238

Contact lens care
Antimicrobial efficacy of two commercial RGP CL care systems, 24
Will young children comply and follow instructions to successfully wear soft CLs? 86
Gentle Touch™, a lens material resistant to protein deposition, 93
Quantitative cleaning efficacy evaluation methods with protein and lipid lens soiling models, 154

Contact lens contamination
Identification of fungi growing within soft CLs: A report from the neotropics, 35
Bacterial contamination in soft CL wearers, 122

Contact lens deposits
CL type, material, and deposits and giant papillary conjunctivitis, 77
Gentle Touch™, a lens material resistant to protein deposition, 93
Normal protein and glycoprotein profiles of reflex tears and trace element composition of basal tears from heavy and slight deposits on soft CLs, 114
Quantitative cleaning efficacy evaluation methods with protein and lipid lens soiling models, 154

Contact lens disinfection
Will young children comply and follow instructions to successfully wear soft CLs?, 86
Antimicrobial efficacy of two commercial RGP CL care systems, 24
A comparative study of the microbiolgic effectiveness of chemical disinfectants and peroxide-neutralizer system, 99
Evaluating the preservative effectiveness of RGP lens care solutions, 238
Bacterial contamination in soft CL wears, 122

Contact lens fitting software
Computerized videokeratoscopy CL software for RGP fitting in a bilateral postkeratoplasty patient: A clinical case report, 52

Contact lens manufacturing
Clinical performance of a spline-based apical vaulting keratoconus corneal CL design, 42

Contact lens power accuracy
Soft toric power accuracy and reproducibility, 163

Contact lens solutions
Antimicrobial efficacy of two commercial RGP CL care systems, 24
Gentle Touch™, a lens material resistant to protein deposition, 93
In vitro ocular irritancy measure of four CL solutions: damage and recovery, 169
Resistance of adhered bacteria to RGP CL solutions, 242
Evaluating the preservative effectiveness of RGP lens care solutions, 238

Contrast sensitivity
Clinical experience with the SimulVue soft bifocal contact lens, 96

Corneal disease
Excimer laser phototherapeutic keratectomy for corneal diseases: A follow-up study, 67

Corneal endothelium
Effects of long-term rigid CL wear on the endothelium of corneal transplants for keratoconus of 10 years after penetrating keratoplasty, 265

Corneal edema
Effect diclofenac sodium (Voltaren™) on hypoxia-induced corneal edema in humans, 61
Relationship between corneal edema and topography, 191

Corneal epithelium
Effect of sodium hyaluronate ophthalmic solution on peripheral staining of rigid CL wearers, 261
In vivo confocal microscopy of corneal wound healing after excimer laser photorefractive keratectomy, 273
High-frequency ultrasound spectral parameter imaging of anterior corneal scars, 268

Corneal infection
A comparative study of the microbiologic effectiveness of chemical disinfectants and peroxide-neutralizer systems, 99
Examination of the conjunctival microbiota after 8 hours of eye closure, 195
Evaluating the preservative effectiveness of RGP lens care solutions, 238

Corneal scars
The use of rigid gas permeable CLs in scarred corneas, 64

High-frequency ultrasound spectral parameter imaging of anterior corneal scars, 268

Corneal topography
Corneal topographic changes after refitting polymethylmethacrylate CL wearers into rigid gas permeable materials, 47
Computerized videokeratoscopy CL software for RGP fitting in a bilateral postkeratoplasty patient: A clinical case report, 52
Videokeratography, 133
Corneal topography in CL wearers following penetrating keratoplasty, 183
Relationship between corneal edema and topography, 191

Corneal warpage
Corneal topographic changes after refitting polymethylmethacrylate CL wearers into rigid gas permeable materials, 47

Corneal ulcers
Ulcerative keratitis from overnight CL wear compared with other life risks, 31
Acanthamoeba keratitis, 73

Dry Eye
Report of the National Eye Institute/industry workshop on clinical trials in dry eyes, 221
Toward a consensus on dry eye, 214
Chronic blepharitis: A review, 200

Editorials
Welcome to the CLAO Annual Meeting, 4
Learning from others, 83
Contact Lenses: A welcome edition, 150
Toward a consensus on dry eye, 214

Extended wear
Ulcerative keratitis from overnight CL wear compared with other life risks, 31
Development of a new soft gas permeable CL with Dk 300, 38
Examination of the conjunctival microbiota after 8 hours of eye closure, 195

External ocular microbiota
Examination of the conjunctival microbiota after 8 hours of eye closure, 195

Excimer laser
Excimer laser phototherapeutic keratectomy for corneal diseases: A follow-up study, 67
Reassembly of the α6β4 integrin and laminin in rabbit corneal basement membrane after excimer laser surgery: A 12-month follow-up, 125
Fitting CLs after excimer laser photorefractive keratectomy for myopia, 281

Giant papillary conjunctivitis
Tear LTC_4 levels in patients with subclinical CL related giant papillary conjunctivitis, 159
CL type, material, and deposits and giant papillary conjunctivitis, 77

Guest editorials
Swimming with the current, 152

HIV
AIDS and the CL practice, 233

Inferior arcuate staining
Role of the post-lens tear film in the mechanism of inferior arcuate staining with ultrathin hydrogel lenses, 175

Keratoconus
Clinical performance of a spline-based apical vaulting keratoconus corneal CL design, 42
Phototherapeutic keratectomy for the treatment of nodular subepithelial corneal scars in patients with keratoconus who are CL intolerant, 130
Effects of long-term rigid CL wear on the endothelium of corneal transplants for keratoconus 10 years after penetrating keratoplasty, 265

Keratocytes
3-D computer models of human keratocytes, 57

Keratometry
Videokeratography, 133
Corneal topography in CL wearers following penetrating keratoplasty, 183

LTC_4
Tear LTC_4 levels in patients with subclinical CL realted giant papillary conjunctivitis, 159

Meibomian gland dysfunction
Chronic blepharitis: A review, 200

Occular irritancy
In vitro ocular irritancy measure of four CL solutions: damage and recovery, 169

Pachymetry
Development of a new soft gas permeable CL with Dk 300, 38
Relationship between corneal edema and topography, 191

Penetrating keratoplasty
Corneal topography in contact lens wearers following penetrating keratoplasty, 183
Effects of long-term rigid CL wear on the endothelium of corneal transplants for keratoconus 10 years after penetrating keratoplasty, 265

Photorefractive keratectomy
Fitting CLs after excimer laser photorefractive keratectomy for myopia, 281
In vivo confocal microscopy of corneal wound healing after excimer laser photorefractive keratectomy, 273

Phototherapeutic keratectomy
Excimer laser phototherapeutic keratectomy for corneal diseases: A follow-up study, 67
Phototherapeutic keratectomy for the treatment of nodular subepithelial corneal scars in patients with keratoconus who are CL intolerant, 130

Polymethylmethacrylate (PMMA) lenses
Corneal topographic changes after refitting polymethylmethacrylate CL wearers into rigid gas permeable materials, 47

Post-lens tear film
Role of the post-lens tear film in the mechanism of inferior arcuate staining with ultrathin hydrogel lenses, 175

Presbyopia
A quantitative and qualitative assessment of the Solitaire bifocal CL, 20
Clinical experience with the SimulVue soft bifocal CL, 96

RGP contact lenses
A quantitative and qualitative assessment of the solitaire bifocal CL, 20
Antimicrobial efficacy of two commercial RGP CL care systems, 24
Computerized videokeratoscopy CL software for RGP fitting in a bilateral postkeratoplasty patient: A clinical case report, 52
Quantitative comparison of *Acanthamoeba castellanii* adherence to rigid versus soft CLs, 11
Tear LTC_4 levels in patients with subclinical CL related giant papillary conjunctivitis, 159
Corneal topographic changes after refitting polymethylmethacrylate CL wearers into rigid gas permeable materials, 47
The use of rigid gas permeable CLs in scarred corneas, 64
Corneal topography in CL wearers following penetrating keratoplasty, 183
Adherence of cysts and trophozoites of *Acanthamoeba* to unworn RGP and soft CLs, 247
Resistance of adhered bacteria to RGP CL solutions, 242
Effect of sodium hyaluronate ophthalmic solution on peripheral staining of rigid CL wearers, 261
Fitting CLs after excimer laser photorefractive keratectomy for myopia, 281

Soft gas permeable lens
Development of a new soft gas permeable CL with Dk 300, 38

Tears
Normal protein and glycoprotein profiles of reflex tears and trace element composition of basal tears from heavy and slight deposits on soft CLs, 114

Toric contact lens
Soft toric lens power accuracy and repoducibility, 163

Videokeratography
Videokeratography, 133
